

UNIT 6- LESSON PLAN

Next Generation Science Standards: Conduct an investigation to provide evidence that evolution occurs in nature and how natural selection plays role in evolution and adaptation (NGSS MS-LS1-1).

Lesson 6.3: Modes of Natural Selection

Objectives: *Students will...*

- a. Explain natural selection with examples.
- b. Differentiate different modes of natural selection.
- c. Explain modes of natural selection with examples.

Topic: Modes of Natural Selection

- a. Definition
- b. Classification
- c. Examples

Lesson Log

Motivation	Introduce the topic through the bell work (see 6.3 bell work).
Pre-Activity	Distribute the Guided Notes (see 6.3 guided notes).
Discussion	Present the lesson (see 6.3 power point presentation).
Assessment	<ol style="list-style-type: none">a. Administer the exit quiz after the lesson (see 6.3 exit quiz).b. Distribute the lesson assignment (see 6.3 assignment)
Others	Use an Online Activity if time permits.
Teacher's Note:	Challenge your students to evaluate the legality/support of the government on research related to evolution. Expect that variety of student's answers.
