

Name: _____ Period: _____ Date: _____

Periodic Table Bell Ringer – Teacher Edition

With reference to a periodic table, decide whether the following statements are true or false. Correct the false statements to make them true.

1. Non-metals oxidise in air or seawater.
2. Metals such as aluminium and copper are excellent conductors of electricity.
3. Nitrogen, oxygen and chlorine are examples of non-metals.
4. Oxygen has a greater density than lithium.
5. Metals are usually lustrous, dense and malleable.

Periodic Table Bell Ringer – Teacher Edition

With reference to a periodic table, decide whether the following statements are true or false. Correct the false statements to make them true.

1. Non-metals oxidise in air and seawater.

False – metals oxidise in air and seawater

2. Metals such as aluminium and copper are excellent conductors of electricity.

True

3. Nitrogen, oxygen and chlorine are examples of non-metals.

True

4. Oxygen has a greater density than lithium.

False – lithium has a greater density than oxygen

5. Metals are usually lustrous, dense and malleable.

True
