Lab Safety Vocabulary Activity - Teacher Edition

ANSWERS

Write the definition for each of the terms relating to lab safety in the spaces below.

Clue	Term	Definition
	Air hole	The part where air is drawn into the Bunsen
	Barrel	The tube which the air-gas mixture is ignited to produce a flame.
	Base	The support (or foot) of the Bunsen.
	Collar	Adjusts the amount of air entering the air hole.
	Gas hose	Supplies gas from the gas tap.
	Blue flame	The hotter flame used for heating.
	Flammable	Objects/substances which can easily catch on fire.
	Safety flame	The yellow flame which is highly visible.
