# Life Science Review Easter Color by Number

Directions: Answer the questions. Use the answer to find the color.

|  |             |                    |   |            |             |  |            |                 |
|--|-------------|--------------------|---|------------|-------------|--|------------|-----------------|
| 1. This type of microscope uses refractive lenses, typically made of glass or plastic, to focus light either into the eye, a camera, or some other light detector. |             |                    | 2. Every living organism is made up of one or more _____.   |            |             | 3. The powerhouse of the cell is the _____.  |            |                 |
| Light  | Electron    | Scanning Electron  | Eyes  | Cells      | Bones       | Nucleus  | Cytoplasm  | Ribosome        |
| Light Green  | Green       | Dark Green         | Brown   | Green      | Light Green | Grey   | Brown      | Light Grey      |
| 4. This occurs in the Cytoplasm.   |             |                    | 5. The inheritance of traits is called _____.   |            |             | 6. What is the process of structural modification over a long period of time that helps to explain diversity of living things? |            |                 |
| Glycolysis   | Kerbs Cycle | Electron Transport | Genetics  | DNA        | Heredity    | Succession   | Evolution  | Migration       |
| Yellow   | Pink        | Green              | Green   | Blue       | Purple      | Red  | Light Pink | Orange          |
| 7. This system consists of heart, blood, and blood vessels   |             |                    | 8. It is the largest geographic biotic unit that consists of similar life forms and environmental conditions. |            |             | 9. It is made up of the interaction of all living organisms in an area with all non-living things.                             |            |                 |
| Cardiovascular   | Endocrine   | Excretory          | Symbiosis   | Ecological | Biome       | Ecosystem  | Earth      | Abiotic Factors |
| Dark Green   | Brown       | Dark Green         | Brown   | White      | Tan         | Brown  | Peach      | White           |
| 10. What is the main function of the Respiratory System?   |             |                    | 11. Which system handles communication between and coordination of all the body systems                       |            |             | 12. This system provides form, support, and stability.   |            |                 |
| Reproduction   | Breathing   | Blood Circulation  | Endocrine   | Muscular   | Nervous     | Skeletal   | Muscular   | Nervous         |
| Tan  | White       | Brown              | Green   | Purple     | Blue        | Light Brown  | Grey       | Black           |

Directions: Use the question numbers from the previous page to determine what color goes where.

For example, the answer to this question on the right is "Cell". You would then color all the spaces that have the number 1 in them green.

1. What is the smallest unit that can live on its own and that makes up all living organisms and the tissues of the body.

|       |      |       |
|-------|------|-------|
| Cell  | Atom | Blood |
| Green | Blue | Red   |
